

Internship Opportunity/bioMEMS: full time summer and/or part-time school year employment. Summer position would be on site in the Washington DC/Baltimore area, and school year position could be a “virtual internship” with work performed at UM. Seeking self-motivated and adaptable engineers to support MEMS projects. Must have knowledge of (i.e working hands-on proficiency) in *one or more* of: electronics, biosensors, mechanical engineering. Training in MEMS/Microsystems preferred, however we will consider a top, well-trained and highly motivated engineer without MEMS experience. M.S or Ph.D candidates preferred; extraordinary undergraduates will be considered. Please send resume to brianj@sbmicrosystems.us.
